Danish Yachts is a privately financed and managed organization which builds and refits military vessels and luxury yachts. Our aim and passion is to design the highest standards of finish, using quality craftsmanship and valued traditions.

It is extremely important to us to safeguard respect for nature and the environment throughout the build process and life of each vessel.

Our staff takes great pride in the high quality of their work and craftsmanship, which is inspired

by the strong forces of nature around us.

We work alongside top naval architects and designers around the world to produce stylish boats perfectly balanced with nature, combining engineering excellence with beauty and performance with elegance.

The shipyard is located in Skagen, at the Northern tip of Denmark, where the Skagerrak and Kattegat Seas meet.

Danish Yachts has three large production halls in Skagen

Harbour covering an area of 5,500 square metres. A major benefit is that the joinery and metal workshops are all on site.

In 2004 Danish Yachts agreed on delivery of 6 marine vessel 29 meters to the Royal Danish Navy, which all were delivered in the period 2006-2008.

Our enviable reputation for attention to detail and exceptional build quality is world renowned, and we welcome you to come and visit us to experience "The Skagen Dream".
